DETAILED ACTION

Applicant's arguments filed April 2, 2007 have been fully considered but they are not persuasive.

Claim Rejections - 35 USC § 102

Claims 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Backhouse (US 6,318,970). See figures 9A to 9D which show a colloidal structure which is manipulated by magnetic fields to pump a fluid. The colloidal structure is formed of ultramicroscopic magnetic particles in a carrier liquid. Each particle is readable as "a solid colloidal particle". Each particle directly contacts a microfluidic stream to move the stream.

Claim Rejections - 35 USC § 103

Claims 5 to 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Backhouse (US 6,318,970). See figures 9A to 9D which show a colloidal structure which is manipulated by magnetic fields to pump a fluid. As shown in these figures, the space is a closed loop which is circular. Whether or not the portion of the space extending between the input structure and the output structure is along a straight line is deemed to be a matter of choice in design because it does not affect the operation of the pump. The structure of claim 6 is likewise deemed to be a matter of choice in design because it does not affect the operation of the pump.

Claim 29 is rejected under 35 U.S.C. 103(a) as being unpatentable over Backhouse in view of either of Raj et al (US 5,958,282) or Mayes (US 6,815,063). Raj et al disclose that

Art Unit: 3746

colloidal particles may be made spherical in shape (col. 1, l. 27). Mayes also discloses that colloidal particles may be made spherical in shape (col. 1, l. 52). In view of this teaching, it would have been obvious to form the ferromagnetic particles of Backhouse of a spherical shape.

Conclusion

Claims 2 to 4 and 10 to 28 stand withdrawn from further consideration as being drawn to non-elected inventions and species.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
